Chapter J: Prohibited Trading Practices

41. Abusive Strategies, Arbitrage and Abnormal Trading

- 41.1. Internet, connectivity delays, and errors sometimes create a situation where the price displayed on the Electronic Trading Platform does not accurately reflect the market rates. The concept of using trading strategies to exploit errors in prices due to internet delays is commonly term as Arbitrage. Below are examples of abusive trading technique (including but not limited to):
 - (a) fraud/illegal actions that led to the transaction;
 - (b) orders placed based on manipulated prices as a result of system errors or system malfunctions;
 - (c) arbitrage trading on prices offered by our platforms as a result of systems errors; and/or
 - (d) coordinated transactions by related parties in order to take advantage of systems errors and delays on systems updates.
- 41.2. Abnormal trading happens when customers conduct intensive transactions or trading volumes in a very short period of time. Short-term trading is not beneficial to the customer since a huge amount of handling fees is payable for frequent transactions and it is also an inappropriate investment method, and customers cannot obtain large profits in these frequent transactions.

Abnormal trades can affect the stability and efficiency of the company trading system, and at the same time it will affect the trading of ordinary customers.

In this regard and in order to protect the interests of the majority of customers, the company does not accept any abnormal trades. Examples of Abnormal Trades (including but not limited to):

 - (a) when there is a 30% of trading volume's holding time is less than 3 minutes;
 - (b) when 30% of the trading volume belongs to the hedged positions established within 3 minutes;

- (c) when customer is using one trading account to manipulate multi-computers and undergo high-volume trading, in order to create a mass trading illusion by misleading information;
- (d) utilizing the internet or computers to conduct "quote delay", and repeatedly "intentionally" or "maliciously" trading in and out of the market with "heavy lots" within 3 minutes, that takes profit from trading platform rather than from the market in a short period of time;
- (e) use of any software to apply any kind of artificial intelligence analysis to the computer systems with the sole purpose to gain unfair advantage and exploit company trading facility;
- (f) use of any software for the purpose to cause serious negative impact on the performance of the company servers and that could prevent the achievement of the best possible result for the clients as regards the execution of their orders.
- (g) Arbitrage trading to take advantages on issued pricing error and delays by Liquidity Provider.
- (h) Hedging trades via different accounts from different owners where they seem it were planned as organisation activities.
- (i) Elaboration from either the same IP or different IP address which can indicate the same person controlling several accounts.
- (j) Any indication or suspicion, in the Company's reasonable discretion, execution of a single high-volume trade or several trades of lower volume conducted at the same rate and at nearly the same time, which represents a subdivision of a big trade into smaller ones trading during fundamental news event and other political or market announcement, abuse of our "negative balance protection" (including, but not limited to, a participant's trading activity patterns that indicate that the participant solely aims to benefit financially from this act without being genuinely interested in trading in the markets and/or taking market risk will be classified under "News Trading":

News Trading is hereby defined as any trading activity executed 5 minutes before or after related currency fundamental news event and other political or market announcement release, trading in relation to same base or quote currency pair with same direction caused those results in the trading account's inability to maintain sufficient equity to cover a market movement of 1250 points value against open positions are subject to classification as "News Trading". Which exceeding this exposure threshold due to execution in the defined time window as such conditions are assessed based on the following leverage formula.

*Essential Margin Reserve In Point Value Is Sole Discretion

$$\text{Maximum Total Position Lot Size Allowable} = \frac{\text{Account Balance}}{\text{Essential Margin Reserve In Point Value}}$$

The following table provides examples of how the maximum allowable lot size is calculated for different account equity for the currency pairs XAU/USD and EUR/USD:

Currency Pair	Account Equity (USD)	Essential Margin Reserve in Points Value	Maximum Total Position Lot Size Allowable	New position (Within 5 min)	Existing Position	Total position	Classification
XAU/USD	1,000	1,250	0.8 lot	0.47 Lot	0.33 Lot	0.8 Lot	Acceptable
EUR/USD	1,000	1,250	0.8 lot	0 Lot	1.8 Lot	*1.8 Lot	Acceptable
XAU/USD	2,000	1,250	1.6 lot	1 Lot	0.6 Lot	1.6 Lot	Acceptable
EUR/USD	2,000	1,250	1.6 lot	1.6 Lot	0 Lot	1.6 Lot	Acceptable
XAU/USD	1,000	1,250	0.8 lot	0.8 Lot	0.5 Lot	1.3 Lot	Unacceptable
EUR/USD	1,000	1,250	0.8 lot	0.2 Lot	1 Lot	1.2 Lot	Unacceptable

In these circumstances, we reserve the right to close/suspend (either temporary or permanently) all of the Client's trading Accounts and/or cancel all Transactions. You will be strictly prohibited from opening any new trading Account(s) and trade with our Company. 44. Risk Acknowledgement

- 44.1. You acknowledge, recognize and understand that trading and investments in leverage Transactions and/or Contracts is:
 - (a) highly speculative;
 - (b) may involved extreme degree of risk; and
 - (c) is appropriate only for persons who can assume substantial risk of loss in excess of their Margin deposit.
- 44.2. You acknowledge and understand that:
 - (a) because only small Margin is required for high leverage Transactions, price changes in the underlying instrument may result in significant losses, which losses may substantially exceed your investment and Margin deposit;
 - (b) certain Market Conditions may make it difficult or impossible to execute Orders at a stipulated price;
 - (c) when you instruct us to enter into any Transaction and/or Contract, any profit and loss arising as a result of fluctuation in the value of the underlying instrument will be entirely for your Account and risk;
 - (d) you agree not to hold us responsible for any losses incurred as a consequence of following any of the our suggestions or information on our Electronic Services platforms, our employees, associates or representatives, unless we have exercised gross negligence in connection herewith;

- (e) we do not guarantee profit or freedom from loss in investment trading and you will not receive such guarantees or similar representations from any of our associates, from Introducer of Business/Affiliate, or representatives hereof or from any other entity with whom you are trading.
- 44.3. Trading in leverage market is high risk and you should evaluate whether such trading is suitable for you, consideration of your experience, objectives, financial resources and other relevant circumstances. You acknowledge that you have read and understand the risk factors that accompany with leverage trading.
- (a) When you enter into foreign currency contracts with us, you will be entering into a privately negotiated Transaction and/or Contract with us, as Principal. We may, in turn, enter into “back-to-back” transactions with others, including our Associates and third party counterparties. We include our mark-up in the Price Quotes we provide to you. Transactions and/or Contracts entered into with us will be an obligation on our part. Both of us are obliged to perform our respective obligations under each Transaction and/or Contract in accordance with its Terms.
- (b) Transactions in leveraged Instruments carry high risk as the amount of Initial Margin may be small relative to the value of the Instruments traded. A small market movement may have a proportionately larger impact on the funds you have deposited. You may sustain a total loss of Initial Margin and any additional funds deposited with us if the market moves against your positions. We reserve the right to liquidate positions without prior notice in the case of any Margin shortfall or if you fail to comply with the request for additional fund for maintaining your position(s).

We may at any time and from time to time amend the leverage ratios in its sole discretion and without any notice on a case by case basis on all or any Accounts of the Client and based on any parameter it chooses, including applying different leverage ratios to different investment, in relation to external events such as government announcements or any news. We will not be liable to you for any loss arising from change in leverage ratio, even if that automatically causes any or all of your trading positions to be closed out or if your Account is treated differently from other client's Accounts.

- 44.4. You will trade through our Electronic Trading platforms which you will also be exposed to risks associated with the platforms/systems including the hardware and software. The result of any system failure may be that your Order is either not executed accordingly to your instructions, is not executed at all, is not able to keep you informed continuously about our positions and/or fulfilment of the Margin requirements. We do not have control over signal power, its reception or routing via internet, configuration of your equipment or reliability of its connection, we cannot be responsible for communication failures, distortion or delays when trading on-line via the internet.
- 44.5. Market conditions and/or the operation of the rules of certain Markets (e.g. the suspension of trading in any instrument or underlying instrument because of price limits or “circuit breaker”) may increase the risk of loss by making it difficult or impossible to effect Transactions and/or Contracts or liquidate/offset positions. The normal pricing relationship between the underlying instruments and the instrument traded may not exist. The absence of a price for a instrument may make it difficult to judge “fair” value.
- 44.6. We will not be liable for erroneous quoting and/or execution errors due to failure of hardware, software or communication lines or system and/or inaccurate external data feeds provided by third party vendors, which in turn, results in errors in your Account balance. In the event of quoting or execution error, we reserve the right to make necessary corrections or adjustments on the Account involved. Any dispute arising from such errors will be resolved by us in our sole discretion.
- 44.7. The Transactions and/or Contracts you are entering into with us as counterparty are not traded on an exchange, but in the off-exchange/Over-the-Counter (OTC) Market. The Over-the Counter (OTC) Market is unregulated, there are no limitations on daily price movements (unless imposed by a government or central bank authority), no rules to regulate valuation or settlement procedures, and no minimum financial requirements for market participants. Accordingly, it may be difficult or impossible to liquidate an existing position, to assess the value, to determine a fair price or to assess the exposure of risk. Before you enter such Transactions, you should familiarize yourself with applicable rules and attendant risks.
- 44.8. Our Electronic Trading Platforms do not support negative prices of financial instruments. In the event of the price of any financial instrument reaching zero (0) or going below, our Electronic Trading Platforms will close any open positions at zero. We will suspend the trading for the affected instrument.
